DETAILED ACTION

1. Rejections based upon Cecchin '862, as well as objections to the specification and the claims, are withdrawn in view of amendment.

Claim Rejections - 35 USC § 112

2. Claims 15, 20, 27 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - (a) In claim 15, the inclusion of "typically" renders the claimed scope indefinite.
 - (b) Claim 20 depends from a cancelled claim.
 - (c) Claim 27 (and claim 30 by dependency) is indefinite because it does not indicate whether the condensate is recirculated to the first reactor or the second reactor. The prior draft of the claim did not contain this problem.

Claim Rejections - 35 USC § 102 and/or 103

3. Claims 8-11, 17, 21-26, 28-30, 39 and 40 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Andtsjo et al. (WO97/13790).

Examples 11-12 disclose a two stage polymerization of propylene including a loop reactor and a gas phase reactor which describes all claimed limitations. Although the MFR₂ has not been expressly disclosed, this limitation would be inherent because

prior examples have shown that this same catalyst would make a polymer with the claimed MFR₂ when hydrogen is substantially or completely excluded (see Example 3). The burden of proof is shifted to applicants to show that the applied reference examples do not contain all claimed limitations. *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980).

In the event that any differences can be shown for the product specified in the claims as opposed to the product taught in the applied reference, such differences would have been obvious to one of ordinary skill in the art as a routine modification of the product in the absence of a showing of unexpected results. *In re Thorpe*, 227 USPQ 964 (Fed. Cir. 1985). Specifically, the reference directs that hydrogen should be substantially or completely removed from the reaction mixture before feeding to the gas phase reactor, and this recommended step further ensures that the MFR₂ of the high molecular weight component would be lower than the maximum set forth in the instant claims.

4. Claims 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andtsjo et al. (WO97/13790).

The parent claims have been discussed with respect to this reference above. The elements of claims 12 and 14 have been disclosed at page 10, line 26, and at page 11, lines 1-11, respectively. One of ordinary skill in the art would be motivated to use these alternative embodiments because they have been specifically recommended by the reference authors, with reasonable success expected.

Allowable Subject Matter

5. Claims 13, 16, 31-38 and 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 32 is further objected to on the grounds that the word "claim" should precede "8" in line 1.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 1713

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rob Rábago whose telephone number is (703) 308-4347. The examiner can normally be reached on Monday - Friday from 9:30 am - 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (703) 308-2450. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
